The

development of molecular biology was not just the fruit of some sort of intrinsic "necessity" in the history of ideas, but was a characteristically historical phenomenon, with all of its unknowns, imponderables and contingencies: the remarkable developments in physics at the beginning of the 20th century highlighted the relative lateness in development in biology, which became the "new frontier" in the search for knowledge about the empirical world. Thank you, our new friends.

A handwritten letter stands out in this age of digital technology. And let us with caution indulge the supposition that morality can be maintained without religion. This will make for better conservation of energy resources in the leading sectors of energy consumption, i.
